TREATment Strategies in Cervical Artery Dissection

Great News! First Swiss Ethics Approval Granted & Important Contracting Reminder

Dear Swiss Principal Investigators and Steering Committee Members,

We are pleased to share an important milestone for the Swiss participation in the TREAT-CAD 2 study.

On **16 July 2026**, the **first approval from a Swiss Ethics Committee** was granted. This marks an important step towards activating the participating Swiss study sites. Thank you to everyone who contributed to reaching this milestone.

To keep the submission process on schedule, we kindly ask all Swiss Principal Investigators to **follow up with their local Legal Department** and encourage them to review and provide feedback on the clinical trial agreement as soon as possible. We have a **30-day timeline** to complete the contract process.

Please note: Once you receive the contract, **do not sign it directly**. Instead, please return the contract with any requested revisions or comments. This will allow us to incorporate the feedback and initiate the signature process with the Sponsor first, in accordance with the required contracting procedure.

The success of TREAT-CAD 2 depends on the dedication and collaboration of all participating sites. We sincerely appreciate your continued commitment and thank you for your support in helping us move efficiently towards site activation and study initiation.

We look forward to working together on the next steps.

Thank you for your excellent collaboration!

Reach out to us with any questions, concerns of hurdles -
we are happy to help you!
